

510M / 464 / 512

Features

510M

- Huge hooper capacity
- Main brush pressure adjustment
- Easy to transport
- Heavy duty chassis in fully coated steel

464

- Extensive filtering surface
- Pre-programmed working settings
- On board battery charger
- Dust filter and main brush replacement

without tools

- Easy to transport
- Adjustable handlebar

512/712

- Huge hopper capacity
- Extensive filtering surface
- Extensive running time
- Main brush pressure adjustment
- Dust flap for large debris collection
- Battery level indicator

Heavy duty chassis in fully coated steel to ensure the highest reliability and endurance.

SLS (Self Levelling System) which adapts immediately the brush thanks to a special shock absorber (464).

Maximum brush wear saving: main brush pressure is easily to adjust from driving position; the led indicator on dashboard allows constant view of brush pressure (512/712).
